
PROJECT TOPIC: HabiTrack-One Place for All Dwelling Needs

Programme: MCA

Project Group Members:

1. Khushboo (2A-24/2484200097)
2. Himanshu Samadhiya (2A-19/2484200078)
3. Vishnu Kumar (2A-53/2484200218)

Project Supervisor: Ms. Deepti Gautam , Assistant Professor(CEA)

Objective: The purpose of developing **HabiTrack** is to make property searching, viewing, and management easier in one platform. It helps users explore properties with interactive maps, detailed property information, secure user accounts, and real-time chat for better communication. The platform is designed to provide a smooth, reliable, and user-friendly experience using modern technologies like React, Node.js, MongoDB, and Socket.io.

Tools required:

➤ **Hardware Requirements:**

- Personal Computer / Laptop
- Minimum 8 GB RAM, i5 or higher processor
- Stable Internet Connection

➤ **Software Requirements:**

- Visual Studio Code
- Node.js and npm
- MongoDB Community Server
- Express.js
- React.js
- Postman (API Testing)
- Git & GitHub (Version Control)
- SASS (UI/UX Design)
- Cloudinary / Firebase (Image Hosting & Notifications)

Abstract: HabiTrack: One Place for All Dwelling Needs is an innovative full-stack property portal designed to simplify property searching, viewing, and management on a single platform. Built using the MERN stack (MongoDB, Express.js, React, and Node.js), it provides a responsive and user-friendly interface. The platform offers features like map-based property search, detailed property listings, secure authentication, and real-time messaging to improve user experience. It supports buyers, sellers, and agents in managing property data efficiently.

With its scalable architecture and modern security measures, HabiTrack ensures smooth performance and data protection. The platform works seamlessly across mobile, tablet, and desktop devices, making property management faster, easier, and more reliable.

Outcomes:
